About US

Single Moms Power is a platform targeting mainly single mothers and stay at home moms. Our goal is to empower our audience, help them reach their highest potential while helping them balance their career, family and personal life. Single Moms Power was started by Marie Clemence Dieudonne "Clemence" after she successfully pursue her higher education and obtain her second degree from Baruch College in 2016 while being a Single Mom. She has since inspired other moms and has amassed a growing number of readers, subscribers and followers. Using both her business and technical background, Clemence effectively captures an engaging audience.

We have over 7350 followers on Twitter @singlemomspower, over 1200 on Instagram @singlemomspower, and are currently focusing on growing our Facebook audience and soon YouTube.

Considering how much we have grown over the past year, we are now opening our platforms to businesses wishing to partner, sponsor or advertise with us and take advantage of our audience. We reach our interactive and dynamic audience via newsletters, on social media platforms such as Twitter, Instagram, Facebook, and LinkedIn. In addition, our responsive website allows easy desktop and mobile access. We also develop and execute comprehensive search engine optimization techniques and practices to improve our ranking on search engines while targeting the right audience. Note that Single Moms Power advertises in compliance with FTC guidelines.
